

### **System-Wide Curtailment Issued for Electric Generation**

High temperatures across the region have significantly increased demand for natural gas electric generation. Effective 3:00 PM PCT July 25, 2018, and until further notice, SoCalGas is issuing a system-wide Curtailment order for electric generation customers in accordance with the [Aliso Canyon Withdrawal Protocol](#). SoCalGas is coordinating with the Balancing Authorities to limit and/or reduce demand in order to effectuate the curtailment.

The high temperatures are expected to continue through the end of this week. Other noncore customers may be required to reduce their natural gas use, in accordance with [SoCalGas Rule 23](#) and [SDG&E Rule 14](#). All noncore customers should continue to monitor ENVOY at [www.socalgasenvoy.com/](http://www.socalgasenvoy.com/) for further updates.

Please contact your Account Representative or the Gas Scheduling Helpline if you have any questions.
